## DETAILED ACTION

### *Claim Rejections - 35 USC § 102*

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 2, 4 and 15 rejected under 35 U.S.C. 102(b) as being anticipated by Roberto (US 5,350,319).

Roberto discloses a connector comprising:

a housing (1);

two flexible circuits (12) having contact areas (13);

pusher members (7);

fitting aperture (18);

insertion openings (36); and

a position means (4, 5).

### *Claim Rejections - 35 USC § 103*

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Art Unit: 2833

4. Claims 1, 3, and 5 are rejected under 35 U.S.C. 103(a) as being unpatentable over Roberto (US 4,975,068).

Similarly to the rejection of claims 2, 4, 15, Roberto substantially disclosed the claimed invention except for there is a three flexible circuit.

It would have been obvious to one having ordinary skill in the art at the time the invention was made to duplicate the flexible circuits up to three flexible circuits, since it has been held that mere duplication of the essential working parts of a device involves only routine skill in the art. *St. Regis Paper Co. v. Bemis Co.*, 193 USPQ 8.

5. Claims 6-11 are rejected under 35 U.S.C. 103(a) as being unpatentable over Roberto (US 4,975,068) in view of Regnier (US 5,163,847).

Roberto substantially disclosed the claimed invention except the flexible circuit have slits.

Regnier disclose a circuit (10) having slit (16).

It would have been obvious to one having ordinary skill in the art at the time the invention was made to provide a slit into Roberto's flexible circuit, as taught by Regnier for proper connection.

#### ***Allowable Subject Matter***

6. Claims 12-14 and 16 objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

7. The following is an examiner's statement of reasons for allowance:

Art Unit: 2833

The prior art of record fails to teach the position means comprises flanges at longitudinal ends of the housing, each being provided with a pin for receiving an aperture of the flexible circuit.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
